

The Belarus Fund

The charity is run by a small group of trustees and 100% of the funds raised goes to Belarus for work with children, adults and older people. Belarus is a country blighted by radiation fallout from the Chernobyl Nuclear accident. This contamination will affect the country for the foreseeable future.

The result is that people are dying younger, cancer is more prevalent and immune systems are seriously compromised.

The charity works with White Flower, a Belarusian charity run by Nicolai Balbutski and he ensures the help gets to where it is most needed.
